

Madalina-Eleonora Gheorghe

Senior UI Engineer · UX-driven product thinking

A collection of feedback from Technical Leads, Application & Project Managers, and team members across major enterprise projects at Cognizant, Deloitte Digital and IBM.

HIGHLIGHTS

“Not only you help us with designing and developing screens for our end user, you also think with us to find the best suitable solution which is smart and user friendly — and even propose solutions we did not think of ourselves that meet the business requirements. This is more than we would expect from a front-end developer.”

Kathleen Renard, Process Manager · Cognizant

“We appreciate your ownership, your E2E view, the extra tasks you picked up outside of your role: UX design... how you take up a key position after replacing the old Tech Lead, you to think along with business about problems and solutions.”

Etienne De Paepe, Manager · Cognizant

“During refinements and clarifications, she challenges the approach and the input data, and thus we managed to increase the quality of the features’ description — resulting in better structured stories and acceptance criteria.”

Andrei-Ioan Popescu, Team Lead · Deloitte Digital

1 OWNERSHIP & STRATEGIC PROBLEM SOLVING

“Madalina proved to be a highly reliable and skilled front-end developer. She can independently take over and deliver complex features; she constantly pays attention to details and is always making sure all the acceptance criteria are met. Her positive attitude and excellent communication skills made her a great addition to the team.”

— **Tech Lead** (Feb 2026)

“I can only sum up positive things about how I experienced you in your job as frontend developer and unofficial screen designer:

Eager to learn — you pick up new aspects of your job and gather the necessary information, be it an international standard or a specific functionality of a tool, so we could opt for different solutions to solve a problem in the front-end design or development.

Focused — your focus is always 100% on the job.

Looking for smart solutions — not only you help us with designing and developing screens for our end user, you also think with us to find the best suitable solution which is smart and user friendly, and even propose solutions we did not think of ourselves that meet the business requirements. This is more than we would expect from a front-end developer.

Drive — you have a big drive to do your job as a professional with high quality standards and finding solutions for the end users.

Hard worker — you keep on picking up tasks and help us realize a large set of requirements release after release.

Strong communication skills — you communicate very transparently, directly and to the point.”

— **Kathleen Renard**, Process Manager · Cognizant (Nov 2024)

“Overall, we are very happy with your contribution to our project and your role in the team. No real learning points could be found, which is very good. We appreciate: your ownership, your involvement, your E2E view, testing of your changes, the extra tasks you picked up outside of your role: UX design, use of new Kendo table component, you being open for feedback and improvements, how you take initiative, your efficient & fast way of working, you being a fast learner, how you take up a key position after replacing the old Tech Lead, you to think along with business about problems and solutions, you being a team player.”

— **Etienne De Paepe**, Manager · Cognizant (Nov 15, 2024)

“She proves her great technical expertise and collaboration skills with every task that is assigned to her and is supporting the project teams with business and technical information for successful integrations.”

— **Cristina-Mihaela Antohe**, Senior Consultant · Deloitte Digital (Nov 7, 2022)

“From early on, she was fully independent from a tech perspective, requiring assistance only to understand the features she needed to implement. Even though she is a less experienced front-end developer than the former one, seeing her work, I can confirm that she managed to surpass everyone’s expectations. She communicates the blockers & issues clearly; she developed complex features faster and with increased quality than before. She handled cloud configuration and installed the applications she developed with ease, even though this is out of her area of expertise. Moreover, during refinements and clarifications, she challenges the approach and the input data, and thus we managed to increase the quality of the features’ description resulting in better structured stories and acceptance criteria. I’m happy that I got the chance to work with her and I would definitely like to continue doing this in the future.”

— **Andrei-Ioan Popescu**, Team Lead · Deloitte Digital (Apr 20, 2022)

“Madalina could quickly take over the tasks assigned to her and deliver them with a very good quality on the agreed time. Madalina is also a team player, and she knows when she needs to raise her hand when an issue appears.”

— **Diego Frison Aladren**, Solution Lead · Deloitte Digital (Apr 20, 2022)

“Overnight she became an expert and point of contact for front-end applications. She has delivered all her tasks at great speed and took on several topics instantly. The entire project is happy to have her onboard.”

— **Kavitha Padmanabham**, Business Analyst · Deloitte Digital (Apr 20, 2022)

“Madalina is always reliable and helps her team members, able to understand the requirements and come up with a solution. It was a joy and I always had confidence while working with her. I strongly recommend her to any new opportunity and challenge.”

— **Raluca Rusu**, Project Manager · IBM (Sep 13, 2021)

2 TECHNICAL EXCELLENCE & CODE QUALITY

“Madalina proved a very good knowledge of Angular and front-end technologies, which she successfully applied to our project. Although the complexity of the project is high, Madalina integrated well into the team and started delivering soon after joining the project. She proved she was a great team player.”

— **Senior Frontend Developer** (Feb 2026)

“You are my favorite developer. I don’t think you can further improve — I’m not kidding, you are very quick in picking up new stories, you ask good questions so we as application manager can fill in the blanks we haven’t thought about. The work is excellent as well. It’s a very difficult topic to work on; we have created a whole new application. You have taken a lot of initiative. There aren’t many bugs and the ones we have are quickly resolved. You are always thinking about finding good customer solutions, so I’m very happy with you. I can’t see any improvements that you can make. We are so happy with the way things are handled.”

— **Iris Vanstraelen**, Application Manager · Cognizant (Nov 14, 2024)

“She tackled new features with ease, always on time and with the highest possible quality. She’s a vocal team member and she’s always deeply involved in discovering all the requirements of what she needs to implement. Madalina’s strong commitment to having all the details in has helped the team get a better understanding of the tasks. I’m confident that she can provide people with the support needed to get the job done.”

— **Andrei-Ioan Popescu**, Team Lead · Deloitte Digital (Oct 19, 2022)

“Feedback from both team and local technical lead is positive as Madalina started working on the project near stabilization phase but managed to get familiar in a short timeframe with the complexity of the project.”

— **Silvana-Roberta Helal**, Senior Manager · Deloitte Digital (May 2, 2022)

“She gave a huge boost to our Web app development; she came up with a very long list of improvements to our existing app and managed to implement a lot of those items in just a couple of weeks. The quality of the code she has been writing, and the overall work quality has been impressive. I would always want her in my team, given the opportunity.”

— **Dragos-Vasile Lungu**, Technical Lead · Deloitte Digital (Jan 28, 2022)

3 MENTORSHIP, LEADERSHIP & TEAM EMPOWERMENT

“Madalina is a really valuable member; more self-initiative in areas which are visibly not covered well on the project will help her present herself with higher seniority — she is currently operating at the next level.”

— **Pavol Tomek**, Project Manager / Scrum Master · Deloitte Digital (Nov 10, 2022)

“Madalina instantly collaborated with the team and importantly understood our objectives quickly. The repeated feedback from the development lead was how quickly our production increased — thanks to Madalina. Madalina clearly has a strong skillset which benefited our FE team significantly. Madalina worked hard to develop her colleagues and ensured they were implementing best-practice techniques.”

— **Jack Taylor**, Manager · Deloitte Digital (Apr 6, 2022)

“During her time spent on Alpha space, Madalina has shown a lot of flexibility and maturity. Even though she had to change teams and industries, from banking to insurance, her experience has been extremely appreciated by our main stakeholders and there have been multiple requests to keep her on Alpha. From a technical perspective, she delivers extremely fast and at a high quality. For example, she managed to bring visible improvements to the web app in just a couple of weeks, as well as mentoring more junior team members. If given the opportunity to match her expertise and desired role, she has the ability to make a huge difference; she has the skills and determination needed.”

— **Isabela Pecete**, Project Manager · Deloitte Digital (Feb 7, 2022)

“Madalina was my mentor during my internship period at IBM iX. She was friendly and open from the start and rapidly developed a learning plan for me. We had a great mentor-mentee relationship during that time, and she was always eager to show me new front-end tricks and quirks. The proactivity which she possesses inspired me a lot through my internship period.”

— **Madalin Tuca**, Frontend Developer · IBM (Sep 2, 2021)

“Madalina had a very good start and path in the project, having in charge a very hard project and client on a team, being in front of the client for direct communication and problem solving. I am very satisfied with her abilities to create and maintain a good working relationship both with the client and her team members, to adapt quickly to change and to help any time it's needed.”

— **Raluca Rusu**, Project Manager · IBM (Feb 15, 2019)

4 PEERS & ADDITIONAL FEEDBACK

“From the short period of time I worked with her, she is very good from a technical perspective. Proactive, good coding style, understands quickly the logic of the code and is able to proceed with her tasks without a lot of help. She communicates well with the team, bringing great energy into the teams she works on, and she can quickly integrate. She knows exactly when to ask for help to speed up delivery, and she is great at estimating how long something will take, which makes planning easy and smooth. Overall, it's a pleasure working with her.”

— **Peer / Team Member** (Jan 2026)

“Keep the desire and courage to try new technologies and the will to learn new stuff. Clean code. Good eye for requirements. Fast learner even when switching projects. Gives and receives feedback. Questions when facing something that isn't clear. Reliability on solving problems and unblocking others.”

— **Peer / Team Member** (Jan 2026)

“She does a really good job — eager to learn, fast to understand, writes beautiful and thoughtful code. Knows the times when to struggle to find answers and when to ask for help. Offering help, gives and receives feedback well, making good (or bad) jokes, giving on point updates.”

— **Peer / Team Member** (Jan 2026)

“Madalina is a hard-working individual, highly motivated and organized. She has very good technical skills and is eager to learn and try new things. From the soft-skills point of view, she communicates very well and proved to be a great team player.”

— **Tech Lead** (Feb 2026)

“Appreciate your guidance and helping bring new talent to our wider iX IBM team, and also your constant strong contribution to our project delivery. Keep up the good work!”

— **Alexandra-Luminita Tanef**, Project Manager · IBM (Aug 6, 2021)

“She quickly managed to learn and acquire quite an extensive set of skills. Her determination to never give up and always learn and improve is what sets her apart from many other developers out there. It’s been a pleasure working with her. She is currently riding the proverbial wave, and I am sure she will achieve great things in the future. I highly recommend her to anyone looking to expand their team(s).”

— **Theodor Palamaru**, Frontend Developer · IBM (Jun 22, 2021)

“Great job on the project, Madalina — the feedback received for the project is very good. Also, I like your drive and attitude, and I hope you will continue to invest in your skills as you did until now, and more.”

— **Sorina Radulescu**, People Manager · IBM (Dec 16, 2020)
